SUMMARY

Full-stack engineer. Lead frontend engineer on Chandigarh University's Lucknow campus site — largest contributor of five, 351 of 777 commits. Top-10 contributor to a 6.2k-star open source AI platform, shipped sites for 2 commercial clients at 100/100 Lighthouse, 1st at Hack with Tricity. Computer Science graduate, 2026.

SKILLS

Languages	TypeScript, JavaScript, Python, Solidity, Lua, Move, Java, C/C++, Rust, SQL
Frontend	React, Next.js, Vite, Tailwind CSS, HTML/CSS, Figma
Backend	Node.js, Express, Flask, MongoDB, MySQL, PostgreSQL, Firebase, REST, GraphQL, OAuth 2.0
Blockchain	Ethereum/EVM, Solana, Arweave & AO, Aptos, ICP, ethers.js, web3.js, IPFS/Pinata
Tools	Git, Docker, Vercel, Postman, Linux, Bash, PowerShell

EXPERIENCE

Frontend Engineer — Chandigarh University, Lucknow Mar 2026 – Oct 2026
Campus web platform — largest contributor of 5 engineers Lucknow, Uttar Pradesh

- Replaced a legacy PHP site with a Next.js 14 App Router build — **351 of 777 commits** and 31K lines across the landing page, programme and admissions pages, and the shared UI behind **74 routes and 268 components**.
- Cut a video section's GPU compositing cost by deferring the iframe to first click, and fixed sticky-scroll animation loops that stalled scrolling on the landing page.
- Owned responsive behaviour to mobile — edge-faded carousels, a 3+2 certification badge layout, and inline mask-image styles working around Tailwind JIT dropping calc() values.

Open Source Contributor — ODS (Osmantic Deployment System) Jul 2026 – Present
Local AI deployment platform — 6.2k stars, 897 forks; top-10 contributor of 57 Remote

- Patched a **DNS-rebinding SSRF (TOCTOU) vulnerability** in the platform's egress layer.
- Brought the Windows PowerShell CLI to parity with Linux: model subcommands, service enable/disable, and Task Scheduler fixes.
- Hardened the integration test suite: centralized auth resolver, dynamic port resolution, and Git Bash support on Windows.

Freelance Web Developer Jul 2025 – Jan 2026
Independent — two commercial clients, sole developer Remote

- Park East by Navdesh Group** (Jan 2026): sales site for a Mohali residential development — specifications, gallery, amenities, and location pages, with an enquiry form that has generated **10+ leads** for the sales team — arcadia-vert.vercel.app.
- Lauffer Vision India** (Jul 2025): corporate site for a Bhopal manufacturer of AI sorting machines, covering solutions across agriculture, recycling, and mining — lauffervisionindia.in.
- Owned both end to end and **scored 100/100 on Lighthouse** for Lauffer Vision India — performance, accessibility, best practices, SEO.

Blockchain Developer Intern Jun 2024 – Aug 2024
Metacrafters Austin, TX (Remote)

- Built decentralized applications on EVM chains — Solidity smart contracts tested against Web3 tooling, NFT transfer contracts, and decentralized storage flows for on-chain asset metadata.
- Developed a cross-chain NFT bridge across **2 networks**, Ethereum Sepolia and Polygon, coordinating deployment and transfer verification on both.

Frontend Developer Intern Jun 2023 – Jul 2023
Diabotics India Pvt. Ltd. — wireframes to responsive production layouts Bareilly, Uttar Pradesh

PROJECTS

ArDacity UI — decentralized component library on Arweave ardacityui.arweave.net
React, TypeScript, Arweave, AO, Lua, Tailwind CSS **Top 30 — Arweave India Hackerhouse**

- Published **40+ components, 10+ blocks, and 20+ AO blocks** served entirely on chain, distributed via a registry JSON rather than a conventional web host.

PokeWidget — animated sprites as Android home-screen widgets ironicrayquaza.github.io/Pokewidget
Kotlin, Android, TypeScript, Tauri **221 installs**

- Shipped two releases to **221 installs**; one generated catalogue drives the Kotlin, web and Tauri desktop builds alike.

UniHub — event platform with on-chain participation uni-event-hub-frontend.vercel.app
Next.js, TypeScript, Solidity, Express, MongoDB, ethers.js, IPFS/Pinata **1st place — Hack with Tricity**

- Built a full-stack platform for college event hosting, registration, and leaderboard tracking, with participation recorded on Ethereum — hosting and funding automated via smart contracts, winner certificates issued as NFTs pinned to IPFS.

Unify — always-on-top desktop music widget unify-phi.vercel.app
Next.js, TypeScript, OAuth 2.0, Tailwind CSS **Peerlist ▲ 15**

- Built one always-on-top widget controlling playback across **5 services** — Spotify, Apple Music, YouTube, YouTube Music, and SoundCloud — over OAuth 2.0 against each provider, handling token refresh, per-service session state, and playlist migration.

EDUCATION

Bachelor of Computer Science — Chandigarh University Aug 2026
CGPA 7.78

Puranchandra Vidyaniketan — Class XII 85.8%, Class X 92.5% 2019 – 2021

ACHIEVEMENTS & CERTIFICATIONS

- 1st place**, Hack with Tricity (Mar 2025).
- Top 30 developers**, Arweave India Hackerhouse (Apr–May 2025).
- Finalist, Hack Mole 5.0 at NIT Jalandhar (Feb 2024); Top 10, Hack Octo 2.0 (Oct 2023).
- Hashmine (Apr 2024) — built and deployed TokenVerse to mainnet.
- NPTEL certifications: Cloud Computing (IIT Kharagpur), Multi-core Computer Architecture (IIT Guwahati).

LEADERSHIP & COMMUNITY

- Mentor, Hashbite (Oct 2024) — guided 50+ students to 60+ ICP mainnet deployments; led a Flutter peer-to-peer workshop at Chandigarh University (Feb 2024), directing a team of four.
- Admin, CU Lounge — a developer community of 400+ members.
